fabriquer un Vox AC30

Posté le : 15 Oct 2007, 16:21 Sujet du message: Re : KIT pour

quelques liens que j'ai trouvé, qui pourront peut-être t'aider pour le chassis, si tu les as pas déjà :

<http://home.wanadoo.nl/jheijer/AC15.htm> (dommage c'est un AC15..., corrections concernant le chassis "I'll get back later with a more complete analysis, but for example he shows the height for the preamp chassis at over 6" when it should be 5", and his width for the two chassis is too narrow when it should be 18" even.")

<http://vintageamps.com/plexiboard/viewtopic.php?t=9675&highlight=chassis+dimensions>

"Inches and (metric)

Bottom section: L=21"(53.3), H=1-1/4"(3.1), flange W=5/8"(1.6), W not including flange=5-1/4"(13.3)

Vertical side section: L=21"(53.3), H=4-5/16"(12.6), Top panel W=2-7/8"(7.3), Panel lip=5/8"(1.6)

Hope that helps. Let us know how it turns out."
