

56p, 86p, 10n: ceramic
10u, 100u: electrolytic
22n, 33n, 47n, 100n, 220n: metalized polyester film
4n7, 470n, 1u: MKT

Diodes: 1N4148 silicon
IC: Philips LM324N

All resistors are metal film. 9k1 and 14k1 are BELOW the input and output jacks.

16mm Alpha pots (PCB mounted)

Knitter-Switch 206N DPDT

Stereo PC mount jacks with metal ferrule.

## Carl Martin Rock Drive

Traced by LoL from unit #98010-00119

Pedal design by Holm Malmquist - Crafted by East Sound Denmark

Fits in an Eddystone 1590BB enclosure.

The "H" marked holes are for the battery snap wires.

In the unit, the pots, jacks, LED and DPDT switch are PCB mounted as shown below.
