

All voltages are average only!
 *1) Standby switch position is different from original SLO.
 *2) R65 and R66 are not part of the original SLO circuit but highly recommended.
 *3) Values of R70/R73 in brackets are original values. Use 50k and 10k for better regulation.

Safety Information & Disclaimer

The devices and circuits described in this document use or generate dangerous electric voltages and currents and may cause lethal electrical shocks or serious injury! If you are not a legal adult (21 years old) or experienced working with dangerously high voltages, do not attempt to follow any of the guidelines or procedures outlined in this documentation without supervision from an adult expert.

The information provided in this document is provided "as is" with no warranties offered for accuracy or reproducibility. Any individual, corporation, group or body of any description or legal entity attempting to use the information provided in this document, do so entirely at their own risk.

This document contains preliminary information.
